Channel-routing

```python
# chat/routing.py
from django.urls import re_path

from . import consumers

websocket_urlpatterns = [
    re_path(r"ws/chat/(?P<room_name>\w+)/$", consumers.ChatConsumer.as_asgi()),
]
```

* as_asgi() classmethod is called to get an **ASGI** application that will instantiate an instance of ChatConsumer for each user-connection
